The purchase and sale transactions of Digital Asset will be in exchange for Fiat or other Digital Asset, as agreed between you and XBO in writing.
- 3.14.2. Digital Asset prices as well as the rates of purchase, sale or exchange thereof are determined in accordance with the price as displayed on the Services. The rates of the Digital Asset may be affected by external factors and our commissions and other fees as detailed on the Services. The Services provide you with an opportunity to submit Orders to purchase, sell or exchange Digital Asset. For the exchange between a pair of Digital Assets or Fiat, you may place an Order, by specifying the type and amount of the Digital Asset to be exchanged and the type of Digital Asset or Fiat to be provided to you following such exchange. Where applicable, you may be able to submit a limit order, by also specifying the limit price for execution of such exchange as well as specifying the expiration date for such Order. There may be minimum and maximum amounts for creating Orders that may vary for each Digital Assets or Digital Asset and Fiat pair.
- 3.14.3. XBO may adjust Orders on the Services according to different criteria, including the date, type and amount of Digital Assets intended for exchange. Each exchange ('Convert') transaction is subject to the applicable Exchange Rate quoted for the given transaction and the applicable time limits for such quote. The quoted Exchange Rate will depend on the market conditions, and you may decide whether to perform an exchange transaction at the Exchange Rate quoted to you. The availability of any Exchange Rate and the ability to purchase or sell your Digital Asset at any specific time or price are not guaranteed.
- 3.14.4. You acknowledge and agree that you are solely responsible for accurately entering any Order or exchange instruction. The Orders and exchange instructions shall be irrevocable and unconditional and shall be binding on you.
- 3.14.5. You hereby understand and agree that due to the highly volatile nature of the price of Digital Assets, the prices displayed on the Services are correct and accurate for the moment the Order was placed by you. The final price will be determined at the moment of the execution of the transaction.
- 3.14.6. Depending on market conditions and other factors, XBO may accept or reject Orders at its sole discretion due to incidents or occurrences which may affect the market conditions or liquidity. In

3.14.7. such cases, XBO, its Affiliates and Covered Persons shall not be liable for any potential loss or opportunity cost.

Different Fixed Periods will result in different Rewards, determined solely at the discretion of XBO. However, XBO retains the right to terminate your participation in the Earn Program fully or partially at its sole discretion. You may request XBO to opt out of the Earn Program and return the Chosen Digital Assets provided by you as part of the Earn Program, fully or

- (x) Reward rates will be determined solely at XBO's discretion and may be updated periodically based on the type of Eligible Digital Asset, market conditions, and associated risk factors. Please be aware that these rates are not related to, may differ significantly from and may not be compatible with interest rates available for traditional bank deposits.
- (xi) The determination of Reward rates is independent of XBO's income or profit, whether directly or indirectly generated from the use of a specific Digital Asset, a category of Digital Assets, or any other sources. XBO makes no guarantee concerning the Rewards and rates thereof.
- (xii) If, at its sole discretion, XBO determines that there are limitations on the Rewards rate offered on your Chosen Digital Assets provided by you as part of the Earn Program, or if restrictions on providing any Rewards to you are imposed for regulatory or legal reasons, your entitlement to Rewards will be limited accordingly. Based on our reasonable interpretation of legal requirements, we reserve the right to limit Rewards without prior notice.

- (xiii) If XBO were to experience bankruptcy or liquidation, Digital Assets used in the Earn Program might not be recoverable.

7. Tokenised Stocks

- 7.1. Tokenised Stocks are blockchain-based digital tokens that reference the value of publicly traded equities or exchange-traded funds ("**Tokenised Stocks**" and "**Underlying Assets**"). Tokenised Stocks provided by the Company are supported through arrangements with authorised external liquidity partners and service providers, including but not limited to Gate.io or its affiliates. These service providers may utilise one or more structures to achieve exposure to the Underlying Assets, such as asset-backed tokenisation vehicles or derivative-based hedging. Holding a Tokenised Stock does not constitute ownership of the Underlying Asset. You do not acquire voting rights, shareholder rights, rights to attend meetings, or direct legal claims on the shares themselves. Tokenised Stocks provide only economic exposure to the Underlying Asset as facilitated by the Company and its partners.
- 7.2. Tokenised Stocks are governed by local regulatory requirements and may be unavailable in certain jurisdictions. Individuals who are residents or citizens of restricted countries are not permitted to access these products. The Company may adjust eligibility criteria or suspend access to Tokenised Stocks at any time if required by regulatory obligations or operational needs.
- 7.3. Tokenised Stocks depend on third-party liquidity providers and custodial service arrangements. The Company does not directly safeguard or hold the Underlying Assets. The Company assumes no responsibility for the performance, solvency, or operational reliability of any external service provider involved in the issuance, hedging, or custody of Tokenised Stocks. The supporting structure for each Tokenised Stock may differ and may be modified over time. The Company may amend these Terms as necessary to reflect on any such changes.
- 7.4. Tokenised Stocks may not always mirror the exact price movements of their Underlying Assets. Variations can arise from differences in market trading hours, blockchain settlement processes, liquidity conditions, or pricing methodologies used by liquidity partners. The Company does not guarantee the continuous availability of counterparties or sufficient market depth for Tokenised Stocks.
- 7.5. Tokenised Stocks operate within evolving legal and regulatory environments. Regulatory authorities may require changes, temporary suspension, or discontinuation of these products at any time. The underlying asset exposures are managed by independent third-party partners; their failure or insolvency could result in partial or complete loss of value. Tokenised Stocks may also be subject to significant market volatility, including price deviations from the underlying traditional markets. Additionally, factors such as blockchain network congestion, smart-contract vulnerabilities, or technical disruptions may cause delays, operational issues, or financial loss.

 - (viii) the value of Digital Assets may be derived from the continued willingness of market participants to exchange Digital Assets for Fiat or other Digital Assets. If such willingness is abolished for any reason, this may result in the potential for a permanent and total loss of value;
 - (ix) Digital Assets are not legal tender in the vast majority of jurisdictions. They may not be backed by physical assets, and are not backed or guaranteed by governments;

- (xii) any other risk associated with the purchase, use, or hold of Digital Assets.
